Delaware Street Drug Report

July 2025

#2025-06

Disclaimer: This report is for harm reduction and educational purposes only and should not be used for professional or publication use. The data included is from sporadic drug residue testing across various locations in Delaware and should not be over generalized. Stamp names are not universal or consistent in the street supply and are provided here for reference only. The selected stamps below are from samples collected during **June 2025**.

Select Stamps	Compounds Detected						
Amiri	BTMPS	***Dextromethorphan**	Medetomidine	Procaine	Tetracaine		
Bossman	4-ANPP	***Cocaine**	Fentanyl	Heroin	Lidocaine	Tetracaine	*+2 others*
Get Hooked	BTMPS	***Dextromethorphan**	Medetomidine	Procaine	Tetracaine	Tetramethyl-4-Piperidinol	
Goya	Caffeine	Fentanyl	Fluorofentanyl	Medetomidine	Tetracaine		
Gucci	***Cocaine**	Fentanyl	Medetomidine	Tetracaine			
Hey Yes	4-ANPP	Fentanyl	Medetomidine	Tetracaine	Xylazine		
NFL	Caffeine	Fentanyl	Lidocaine	Methamphetamine	Procaine	Tetracaine	
NFL	***Cocaine**	Fentanyl	Lidocaine	Procaine			
The Arrow	Fentanyl	Medetomidine	Procaine	Tetracaine			
**Used Device*	Caffeine	***Cocaine**	Fentanyl	Lidocaine			
**Used Device*	4-ANPP	Fentanyl	Mannitol	***Quinine**			
**Bought as Dope*	4-ANPP	***Cocaine**	Fentanyl	Heroin	***Quinine**	Tetracaine	*+5 others*
**Bought as Dope*	Fentanyl	Medetomidine	Procaine	***Quinine**	Tetracaine	Xylazine	*+4 others*

*Emerging Substances:

Cocaine

DEA Schedule II stimulant drug with strong addictive potential that can cause restlessness, paranoia, insomnia, loss of appetite, irregular heartbeat, and seizures.

Quinine

A medication primarily used to treat malaria, but it has also been detected as an adulterant in drugs such as cocaine and heroin. Some studies show that quinine can enhance the behavioral effects of stimulants, and at high levels (toxicity) can cause vomiting and blindness.

Dextromethorphan (DXM)

A widely used over-the-counter cough medicine that can be misused. When consumed at high doses, it can cause delusions, hallucinations, paranoia, tachycardia, high blood pressure, and elevated body temperatures.

Delaware Street Drug Report

July 2025

#2025-06

Trending Substances

- One notable change in June was an increase in the presence of cocaine from 29% to 37% in samples tested. Cocaine was found both by itself and in samples containing fentanyl.
- The presence of methamphetamine peaked in May, returning this month to levels more consistent with March and April. This may have been due to random sample collection, and not an indication of an overall trend.

Compound Detected	Jan-25 (12 samples)	Feb-25 (13 samples)	Mar-25 (106 samples)	Apr-25 (92 samples)	May-25 (127 samples)	Jun-25 (108 samples)
