Delaware Street Drug Report

November 2025

#2025-12

Disclaimer: This report is for risk mitigation and educational purposes only and should not be used for professional or publication use. The data included is from sporadic drug residue testing across various locations in Delaware and should not be over generalized. Stamp names are not universal or consistent in the street supply and are provided here for reference only. The selected stamps below are from samples collected during **October 2025**.

Select	Compounds Detected						
7-Up	Meth-amphetamine						
CNN Breaking News	Fentanyl	***Medetomidine**	Procaine	***Tetracaine**			
Fly High	4-ANPP	BTMPS	Fentanyl	***Medetomidine**	Procaine	***Tetracaine**	*+ 2 others*
Fly High	Fentanyl	Lidocaine	***Medetomidine**	Meth-amphetamine	Procaine	Xylazine	
Get Hook	Cocaine	Fentanyl	***Medetomidine**	Procaine	***Tetracaine**		
Ghost	4-ANPP	Cocaine	Diphenhydramine	Levamisole	Fentanyl	Xylazine	*+ 3 others*
Joker	4-ANPP	Fentanyl	Heroin	***Medetomidine**	Procaine	***Tetracaine**	*+ 2 others*
Joker	4-ANPP	Acetaminophen	Fentanyl	Heroin	Lidocaine	***Tetracaine**	
Sexy	4-ANPP	Fentanyl	***Medetomidine**	***Tetracaine**			
Sexy	Acetaminophen	BTMPS	Fentanyl	Lidocaine	***Medetomidine**	***Tetracaine**	
Sexy	***Medetomidine**	Procaine	***Tetracaine**				
Tony Montana	Fentanyl	***Medetomidine**	***Tetracaine**				
U-Haul	***Medetomidine**	Fentanyl					
X-Men	4-ANPP	Fentanyl	Heroin	Mannitol	Xylazine		
**Used Device*	Cocaine	Fentanyl	***Medetomidine**	***Tetracaine**			

*Substance Highlight:

Medetomidine

Like xylazine, medetomidine is a veterinary tranquilizer not approved for human use, but it is considered to be more potent. Common adverse effects are sedation, bradycardia, hypotension, and severe withdrawal symptoms.

Tetracaine

Local anesthetics (commonly Lidocaine, Procaine, and Tetracaine) can increase the severity of other responses to illicit drugs, and at high levels (toxicity) can trigger their own symptoms, like seizures. Tetracaine has a longer duration effect than other local anesthetics and is commonly seen with medetomidine in street drug samples.

Delaware Street Drug Report

November 2025

#2025-12

Trending Substances

- The most common substances detected last month were fentanyl, medetomidine, and tetracaine.
- Tetracaine was the most common local anesthetic detected. This was the first time since February 2025 where it was detected in more than 50% of samples.
- Compared to last month, there were more isolated cocaine and methamphetamine samples in October. This may explain the decline in fentanyl detection in the same sample size.

Compound Detected	May-25 (127 samples)	Jun-25 (108 samples)	Jul-25 (100 samples)	Aug-25 (89 samples)	Sep-25 (53 samples)	Oct-25 (54 samples)
Xylazine	28%	12%	19%	27%	26%	17%
Medetomidine	65%	60%	45%	57%	53%	**61%**
Fentanyl	72%	66%	54%	81%	92%	**69%**
Tetracaine	42%	46%	36%	49%	49%	**56%**
Procaine	28%	30%	26%	33%	13%	20%
Lidocaine	24%	21%	27%	20%	28%	17%
4-ANPP	44%	39%	29%	49%	53%	39%
BTMPS	12%	4%	4%	6%	21%	7%
Fluorofentanyl	5%	3%	0%	2%	0%	0%
Cocaine	29%	37%	39%	33%	34%	33%
Methamphetamine	31%	10%	19%	8%	9%	13%
Pregabalin	4%	1%	0%	0%	0%	0%
