Delaware Street Drug Report

December 2025

#2025-13

Disclaimer: This report is for risk mitigation and educational purposes only and should not be used for professional or publication use. The data included is from sporadic drug residue testing across various locations in Delaware and should not be over generalized. Stamp names are not universal or consistent in the street supply and are provided here for reference only. The selected stamps below are from samples collected during **November 2025**.

Select Stamps	Compounds Detected						
Blackhawk	4-ANPP	Fentanyl	***Quinine**				
Blue Magic	4-ANPP	Acetaminophen	Fentanyl	Lidocaine	Medetomidine	Procaine	Tetracaine
Ghost	4-ANPP	Cocaine	Fentanyl	***Quinine**			
H2O	4-ANPP	Fentanyl	Heroin	Medetomidine	Procaine	Tetracaine	*+3others*
Mojo	Cocaine	Fentanyl	Heroin	Lidocaine	*Procaine	Tetracaine	*+4 others*
Petco	4-ANPP	Fentanyl	***Quinine**				
Rats	4-ANPP	Cocaine	Fentanyl	Heroin	Procaine	Tetracaine	*+2 others*
Sexyy Red	Fentanyl	Medetomidine	Procaine				
Slime	Acetaminophen	***BTMPS**	Fentanyl	***Quinine**			
Super Bowl	4-ANPP	Fentanyl	Lidocaine	Medetomidine	Procaine	Tetracaine	
The Best	4-ANPP	***BTMPS**	Fentanyl	Lidocaine	Medetomidine	Procaine	Tetracaine
U-Haul	4-ANPP	Caffeine	Fentanyl	***Levamisole**	Medetomidine	Procaine	Tetracaine
Uhaul	4-ANPP	Caffeine	Fentanyl	***Levamisole**	Medetomidine	Xylazine	
Undertaker	4-ANPP	Acetaminophen	Fentanyl	Lidocaine	Medetomidine	Procaine	Tetracaine

*Substance Highlight:

Quinine

A medication primarily used to treat malaria, but it has also been detected as an adulterant in drugs such as cocaine and heroin. Some studies show that quinine can enhance the behavioral effects of stimulants, and at high levels (toxicity) can cause vomiting and blindness.

BTMPS (Tinuvin®)

An industrial chemical not intended for use in humans or animals. It is used as a protective coating in plastics to prevent breakdown from UV rays. At this time, side effects from BTMPS in humans are not well known.

Levamisole

A veterinary antiparasitic that is used as an adulterant in street drugs, particularly in cocaine, heroin, and fentanyl. In humans, levamisole can cause adverse health affects such as a reduction in white cell count and necrotic skin wounds.

Delaware Street Drug Report

December 2025

#2025-13

Trending Substances

- This month there was a decrease in methamphetamine and an increase in fentanyl in samples tested. This is potentially due to less isolated methamphetamine samples collected this month.
- The presence of certain local anesthetics, quinine, and BTMPS remains unstable, with wide variation over the last few months.
- Although not widespread, there has recently been a noticeable increase in the detection of levamisole.

Compound Detected	Jun-25 (108 samples)	Jul-25 (100 samples)	Aug-25 (89 samples)	Sep-25 (53 samples)	Oct-25 (54 samples)	Nov-25 (81 samples)
