Delaware Street Drug Report

April 2026

#2026-08

Disclaimer: This report is for risk mitigation and educational purposes only and should not be used for professional or publication use. The data included is from sporadic drug residue testing across various locations in Delaware and should not be over generalized. Stamp names are not universal or consistent in the street supply and are provided here for reference only. The selected stamps below are from samples collected during **March 2026**.

Select Stamps	Compounds Detected						
CVS	Fentanyl	Medetomidine	Procaine	Tetracaine	4-ANPP		
Fast Play	4-ANPP	Caffeine	Fentanyl	Medetomidine	Xylazine	Cocaine	
i-Hault	Caffeine	Fentanyl	Medetomidine	Xylazine	4-ANPP		
Mojo	4-ANPP	Fentanyl	Lidocaine	**Mannitol***	Methamphetamine	Xylazine	Monoacetylmorphine
Mojo	Fentanyl	Medetomidine					
Nike	Cocaine	Fentanyl	**Mannitol***	Medetomidine	Methamphetamine		
Nike	Cocaine	Fentanyl	**Mannitol***	Methamphetamine			
Pill or Tablet	**Alprazolam***						
Suga House	4-ANPP	Fentanyl	Medetomidine	Procaine	Tetracaine		
U-Haul	4-ANPP	Caffeine	Fentanyl	Medetomidine	Xylazine		
U-Haul	4-ANPP	Fentanyl	Medetomidine	Xylazine			
Used Device	Cocaine						
Used Device	Caffeine	Cocaine	Fentanyl	Medetomidine	Xylazine		
Used Device	Methamphetamine	**Triisopropanolamine***					

*Substance Highlight:

Triisopropanolamine

An industrial chemical used in personal care and manufacturing products. It is not a psychoactive agent on its own but its presence may indicate contaminated drug manufacturing processes.

Mannitol

A pharmaceutical sugar alcohol commonly used as a cutting agent in various illicit street drugs. It is a diuretic, and can cause electrolyte imbalances and dehydration, and rarely anaphylaxis when injected.

Alprazolam

A benzodiazepine known by the brand name Xanax. It is usually prescribed for anxiety or panic disorders. It carries a critical high risk of fatal overdose, severe respiratory depression and unpredictable intoxication when combined with other drugs (particularly fentanyl) or alcohol.

Delaware Street Drug Report

April 2026

#2026-08

Trending Substances

- Fentanyl and medetomidine detection decreased this month, while cocaine, methamphetamine, and xylazine detection increased. However, this is likely due to sample size this month and not an indication of an overall trend.
- This month, the sample size was significantly smaller than previous months. As a result, the comparative power of these findings is limited, and month-to-month differences should be interpreted with caution.

Compound Detected	Oct-25 (54 samples)	Nov-25 (81 samples)	Dec-25 (35 samples)	Jan-26 (47 samples)	Feb-26 (25 samples)	Mar-26 (17 samples)
Xylazine	17%	16%	6%	13%	8%	35%
Medetomidine	61%	63%	60%	66%	88%	65%
Fentanyl	69%	86%	69%	98%	96%	77%
