Delaware Street Drug Report

August 2026

#2026-14

Disclaimer: This report is for risk mitigation and educational purposes only and should not be used for professional or publication use. The data included is from sporadic drug residue testing across various locations in Delaware and should not be over generalized. Stamp names are not universal or consistent in the street supply and are provided here for reference only. The selected stamps below are from samples collected during **July 2026.**

Select Stamps	Compounds Detected						
Bad ASS	Caffeine	Fentanyl	***Phenacetin**	Procaine			
BugyBoo	Acetaminophen	Fentanyl	***Fluorofentanyl**	Quinine			
Coleslaw	Acetaminophen	Fentanyl	***Fluorofentanyl**	Quinine			
Coleslaw	Acetaminophen	***Cocaine**	Fentanyl	***Fluorofentanyl**	Quinine		
CoolCat	Acetaminophen	Fentanyl	***Fluorofentanyl**	Quinine			
German	***Cocaine**						
Honda	4-ANPP	Fentanyl	Lidocaine	Medetomidine	Tetracaine		
Pepsi	Fentanyl	Medetomidine					
The Joker	4-ANPP	Fentanyl	Medetomidine	Procaine	Tetracaine		
White House	Fentanyl	Medetomidine	Tetracaine				
White House	Benzoylecgonine	***Cocaine**					
**Used Device*	***Cocaine**	***Phenacetin**					
**Used Device*	***Cocaine**	Fentanyl	***Phenacetin**				
**Used Device*	Benzoylecgonine	Cannabinol	***Cocaine**	Medetomidine	***Phenacetin**	THC	

*Substance Highlight:

Phenacetin

Phenacetin is commonly used as an adulterant in cocaine and more recently opioid supplies. It is a known carcinogen (proven cause of cancer), is toxic to the kidneys, and can damage the heart, blood, and urinary system.

Fluorofentanyl

A synthetic opioid that is a structural analog of fentanyl. It is similar to fentanyl, but may be slightly less potent. It is most commonly detected with fentanyl, cocaine, or methamphetamine.

Cocaine

An intense, DEA Schedule II stimulant with strong addictive potential that causes restlessness, paranoia, insomnia, loss of appetite, irregular heartbeat, and seizures.

Delaware Street Drug Report

August 2026

#2026-14

Trending Substances

- This month had the first detection of fluorofentanyl so far this year, and also marked the first time that xylazine was not detected in any samples.
- Continuing the trend from previous months, the prevalence of cocaine reached 78% of samples tested, the highest prevalence rate so far.
- It is important to remember that this testing is a convenience sample, meaning the vast majority of samples are volunteered by individuals to be tested, and is not random or even sampling of the general Delaware drug supply. This change in prevalence is mostly driven from users of stimulants increasingly submitting samples for testing.

Compound Detected	Feb-26 (25 samples)	Mar-26 (17 samples)	Apr-26 (42 samples)	May-26 (64 samples)	Jun-26 (137 samples)	Jul-26 (72 samples)
Xylazine	8%	35%	2%	5%	1%	0%
Medetomidine	88%	65%	21%	36%	24%	15%
Fentanyl	96%	77%	71%	42%	23%	19%
Tetracaine	84%	24%	43%	27%	20%	11%
Procaine	84%	24%	45%	11%	7%	3%
Lidocaine	20%	6%	2%	9%	4%	1%
4-ANPP	52%	41%	29%	11%	8%	4%
BTMPS	4%	0%	0%	0%	0%	1%
Fluorofentanyl	0%	0%	0%	0%	0%	6%
Cocaine	8%	29%	37%	56%	70%	78%
Methamphetamine	8%	18%	7%	6%	3%	1%
Pregabalin	0%	0%	0%	0%	0%	0%
Heroin	4%	0%	2%	0%	1%	0%
Carfentanil	0%	0%	0%	0%	0%	0%
Quinine	4%	0%	2%	0%	1%	6%
Levamisole	0%	6%	2%	2%	0%	0%
