Delaware Street Drug Report

September 2026

#2026-15

Disclaimer: This report is for risk mitigation and educational purposes only and should not be used for professional or publication use. The data included is from sporadic drug residue testing across various locations in Delaware and should not be over generalized. Stamp names are not universal or consistent in the street supply and are provided here for reference only. The selected stamps below are from samples collected during **August 2026**.

Select Stamps	Compounds Detected						
Casamigos	Fentanyl	***Medetomidine**	Tetracaine				
Good Time	4-ANPP	Fentanyl	***Medetomidine**	Procaine	Tetracaine		
Gucci	Fentanyl	***Medetomidine**	Tetracaine				
KFC	Fentanyl	***Medetomidine**					
Maria	4-ANPP	Fentanyl	***Medetomidine**	Melatonin	Tetracaine		
Super Sonic	Fentanyl	***Medetomidine**	Tetracaine				
Uber	4-ANPP	Fentanyl	***Medetomidine**	Procaine	Tetracaine		
Windex	4-ANPP	***Cocaine**	Fentanyl	Mannitol	***Medetomidine**		
Windex	4-ANPP	Fentanyl	***Medetomidine**				
**Used Device*	4-ANPP	Fentanyl	Lidocaine	***Medetomidine**	Phenethyl 4-ANPP	Procaine	Tetracaine
**Used Device*	***Cocaine**	Methamphetamine					
**Used Device*	Benzoylecgonine	***Cocaine**	Fentanyl	Medetomidine	***Phenacetin**		
**Used Device*	***Cocaine**	***Medetomidine**	***Phenacetin**				
**Used Device*	***Cocaine**	***Phenacetin**					

*Substance Highlight:

Phenacetin

Phenacetin is commonly used as an adulterant in cocaine and more recently opioid supplies. It is a known carcinogen (proven cause of cancer), is toxic to the kidneys, and can damage the heart, blood, and urinary system.

Medetomidine

Like xylazine, medetomidine is a veterinary tranquilizer not approved for human use, but it is considered to be more potent. Common adverse side effects are sedation, bradycardia, and severe withdrawal symptoms.

Cocaine

An intense, DEA Schedule II stimulant with strong addictive potential that causes restlessness, paranoia, insomnia, loss of appetite, irregular heartbeat, and seizures.

Delaware Street Drug Report

September 2026

#2026-15

Trending Substances

- This month showed the first decrease in cocaine detection since February. However, a larger percentage of samples were returned with no compounds detected this month.
- Importantly, remember that the prevalence of cocaine is driven by the number of stimulant samples being submitted and not a general shift in the drug supply.
- Continuing the trend from last month, xylazine was not detected in any samples.

Compound Detected	Mar-26 (17 samples	Apr-26 (42 samples)	May-26 (64 samples)	Jun-26 (137 samples)	Jul-26 (72 samples	Aug-26 (174 samples)
Xylazine	35%	2%	5%	1%	0%	0%
Medetomidine	65%	21%	36%	24%	15%	20%
Fentanyl	77%	71%	42%	23%	19%	22%
Tetracaine	24%	43%	27%	20%	11%	11%
Procaine	24%	45%	11%	7%	3%	6%
Lidocaine	6%	2%	9%	4%	1%	4%
4-ANPP	41%	29%	11%	8%	4%	8%
BTMPS	0%	0%	0%	0%	1%	0%
Fluorofentanyl	0%	0%	0%	0%	6%	0%
Cocaine	29%	37%	56%	70%	78%	53%
Methamphetamine	18%	7%	6%	3%	1%	9%
Pregabalin	0%	0%	0%	0%	0%	0%
Heroin	0%	2%	0%	1%	0%	0%
Carfentanil	0%	0%	0%	0%	0%	0%
Quinine	0%	2%	0%	1%	6%	0%
Levamisole	6%	2%	2%	0%	0%	0%
